INTRODUCTION

Founded in 1904, the Fédération Internationale de l'Automobile (FIA) has a mandate to govern the practice of motor sport worldwide by the authorities of 144 nations. Through the International Karting Commission (CIK-FIA), it awards the only official titles of FIA Karting World and European Champion at the end of the most prestigious Competitions, which are organised in collaboration with its Promoter RGMMC Group and the National Sporting Authorities (ASN) concerned.

In addition to motor sport, the FIA is also concerned with automobile mobility and tourism, with safety as a priority.

The purpose of this dossier is to present the Karting discipline as well as the various FIA Karting Championships, Cups and Trophies for the 2023 season.

KARTING

Invented by the Americans in the 1950s, Karting quickly became a great success in Europe and today is a fully-fledged motorsport discipline.

Karting is a great school of life for young people and the best way to learn about driving and racing. The best route for the future car Champions, Karting is also practiced by enthusiasts who devote all their energy to it. The FIA Karting Championships are open to drivers from the age of 12, with no upper age limit.

Although the kart is basically a machine of simple design, the high standard of Competition makes it a very high level sport where ultra-competent professional teams confront each other.

The spectacle provided by Karting events has an intensity rarely seen in motorsport. The closeness of the track, a succession of races throughout the weekend, constant suspense and the beauty of the struggle for victory make it an exciting discipline to experience for both specialists and the general public.

In addition, karting is particularly suitable for live TV viewing and sharing on social networks.

KARTING DRIVERS BEFORE BECOMING F1 CHAMPIONS

The history of motorsport includes innumerable Champions who have stood out in karting before reaching Formula 1 or shining in other disciplines.

THE CIK-FIA

Created in 1962, the International Karting Commission is an integral part of the International Automobile Federation, as are the commissions of the other disciplines of motorsport.

Its main missions are to ensure the unity of Karting, to promote and develop the practice of the discipline throughout the world, to develop sporting and technical regulations and to establish the International Competition calendar.

President of the CIK-FIA: **Akbar Ebrahim**

A WORD FROM THE PRESIDENT

CIK-FIA President Akbar Ebrahim has high hopes for the 2023 season, which is full of exciting new features.

“High-level karting is doing well with top quality events that attract many participants. This reflects the current good health of the market and its industry. The FIA Karting European and World Championships are the benchmark for all competitions, thanks to our collaboration with promoter RGMMC Group. In 2023, the FIA Karting Academy Trophy will once again become a showcase for emerging talent, by refocusing on young people new to FIA Karting competition. I am convinced that we are heading towards a greater number of participants in our Championships, Cups and Trophies, accompanied by even greater media coverage. This positive dynamic is also to the credit of the organisers, manufacturers and teams who are doing an excellent job that benefits the whole of karting.

As a partner of the FIA Karting World Championships in 2022, Mondokart.com has extended its support to the European KZ and KZ2 Championships this year.

To accompany this momentum, it is worth noting the two new host countries for the FIA Karting European OK and OK-Junior Championships. The Czech Republic with the Třinec circuit and Denmark with the Rødby circuit.

The debut of OK-N is an important turning point in developing accessibility to a wider public at national level. The initial feedback is already very positive and what lies ahead is exciting.

The IKR (International Karting Ranking), which was implemented at the beginning of the year, is a very interesting tool to evaluate the progress of drivers from all over the world in a large number of categories. I have no doubt that it will increase the interest of enthusiasts and enhance the efforts of drivers.

I wish an excellent karting season to all the participants in this sport.

RGMMC, PROMOTER OF THE FIA KARTING CHAMPIONSHIPS

The RGMMC Group is the Official Promoter of the FIA Karting European and World Championships for the period of 2021-2023. Based in Switzerland, RGMMC Group is renowned for the great experience in the field of its owner Roland Geidel, President James Geidel and the team that has been around for many years.

Increasing the audience for Karting Competitions, attracting new partners and working closely with ASNs (national federations) are the priorities of RGMMC Group. The Promoter also develops the communication and media coverage of the events by providing live video viewing during the events and by partnering with Motorsport.tv for broadcast around the world.

OK-N: BACK TO THE ROOTS

From 2023, karting will expand its base with a new concept derived from the premier category, the OK.

Accessibility, reliability and performance

OK-N will allow National Championships to use a universal category, adapted to all of the participants of each National Sporting Authority for kart racing, approaching the top level, in every country that wants it.

Technical specifications

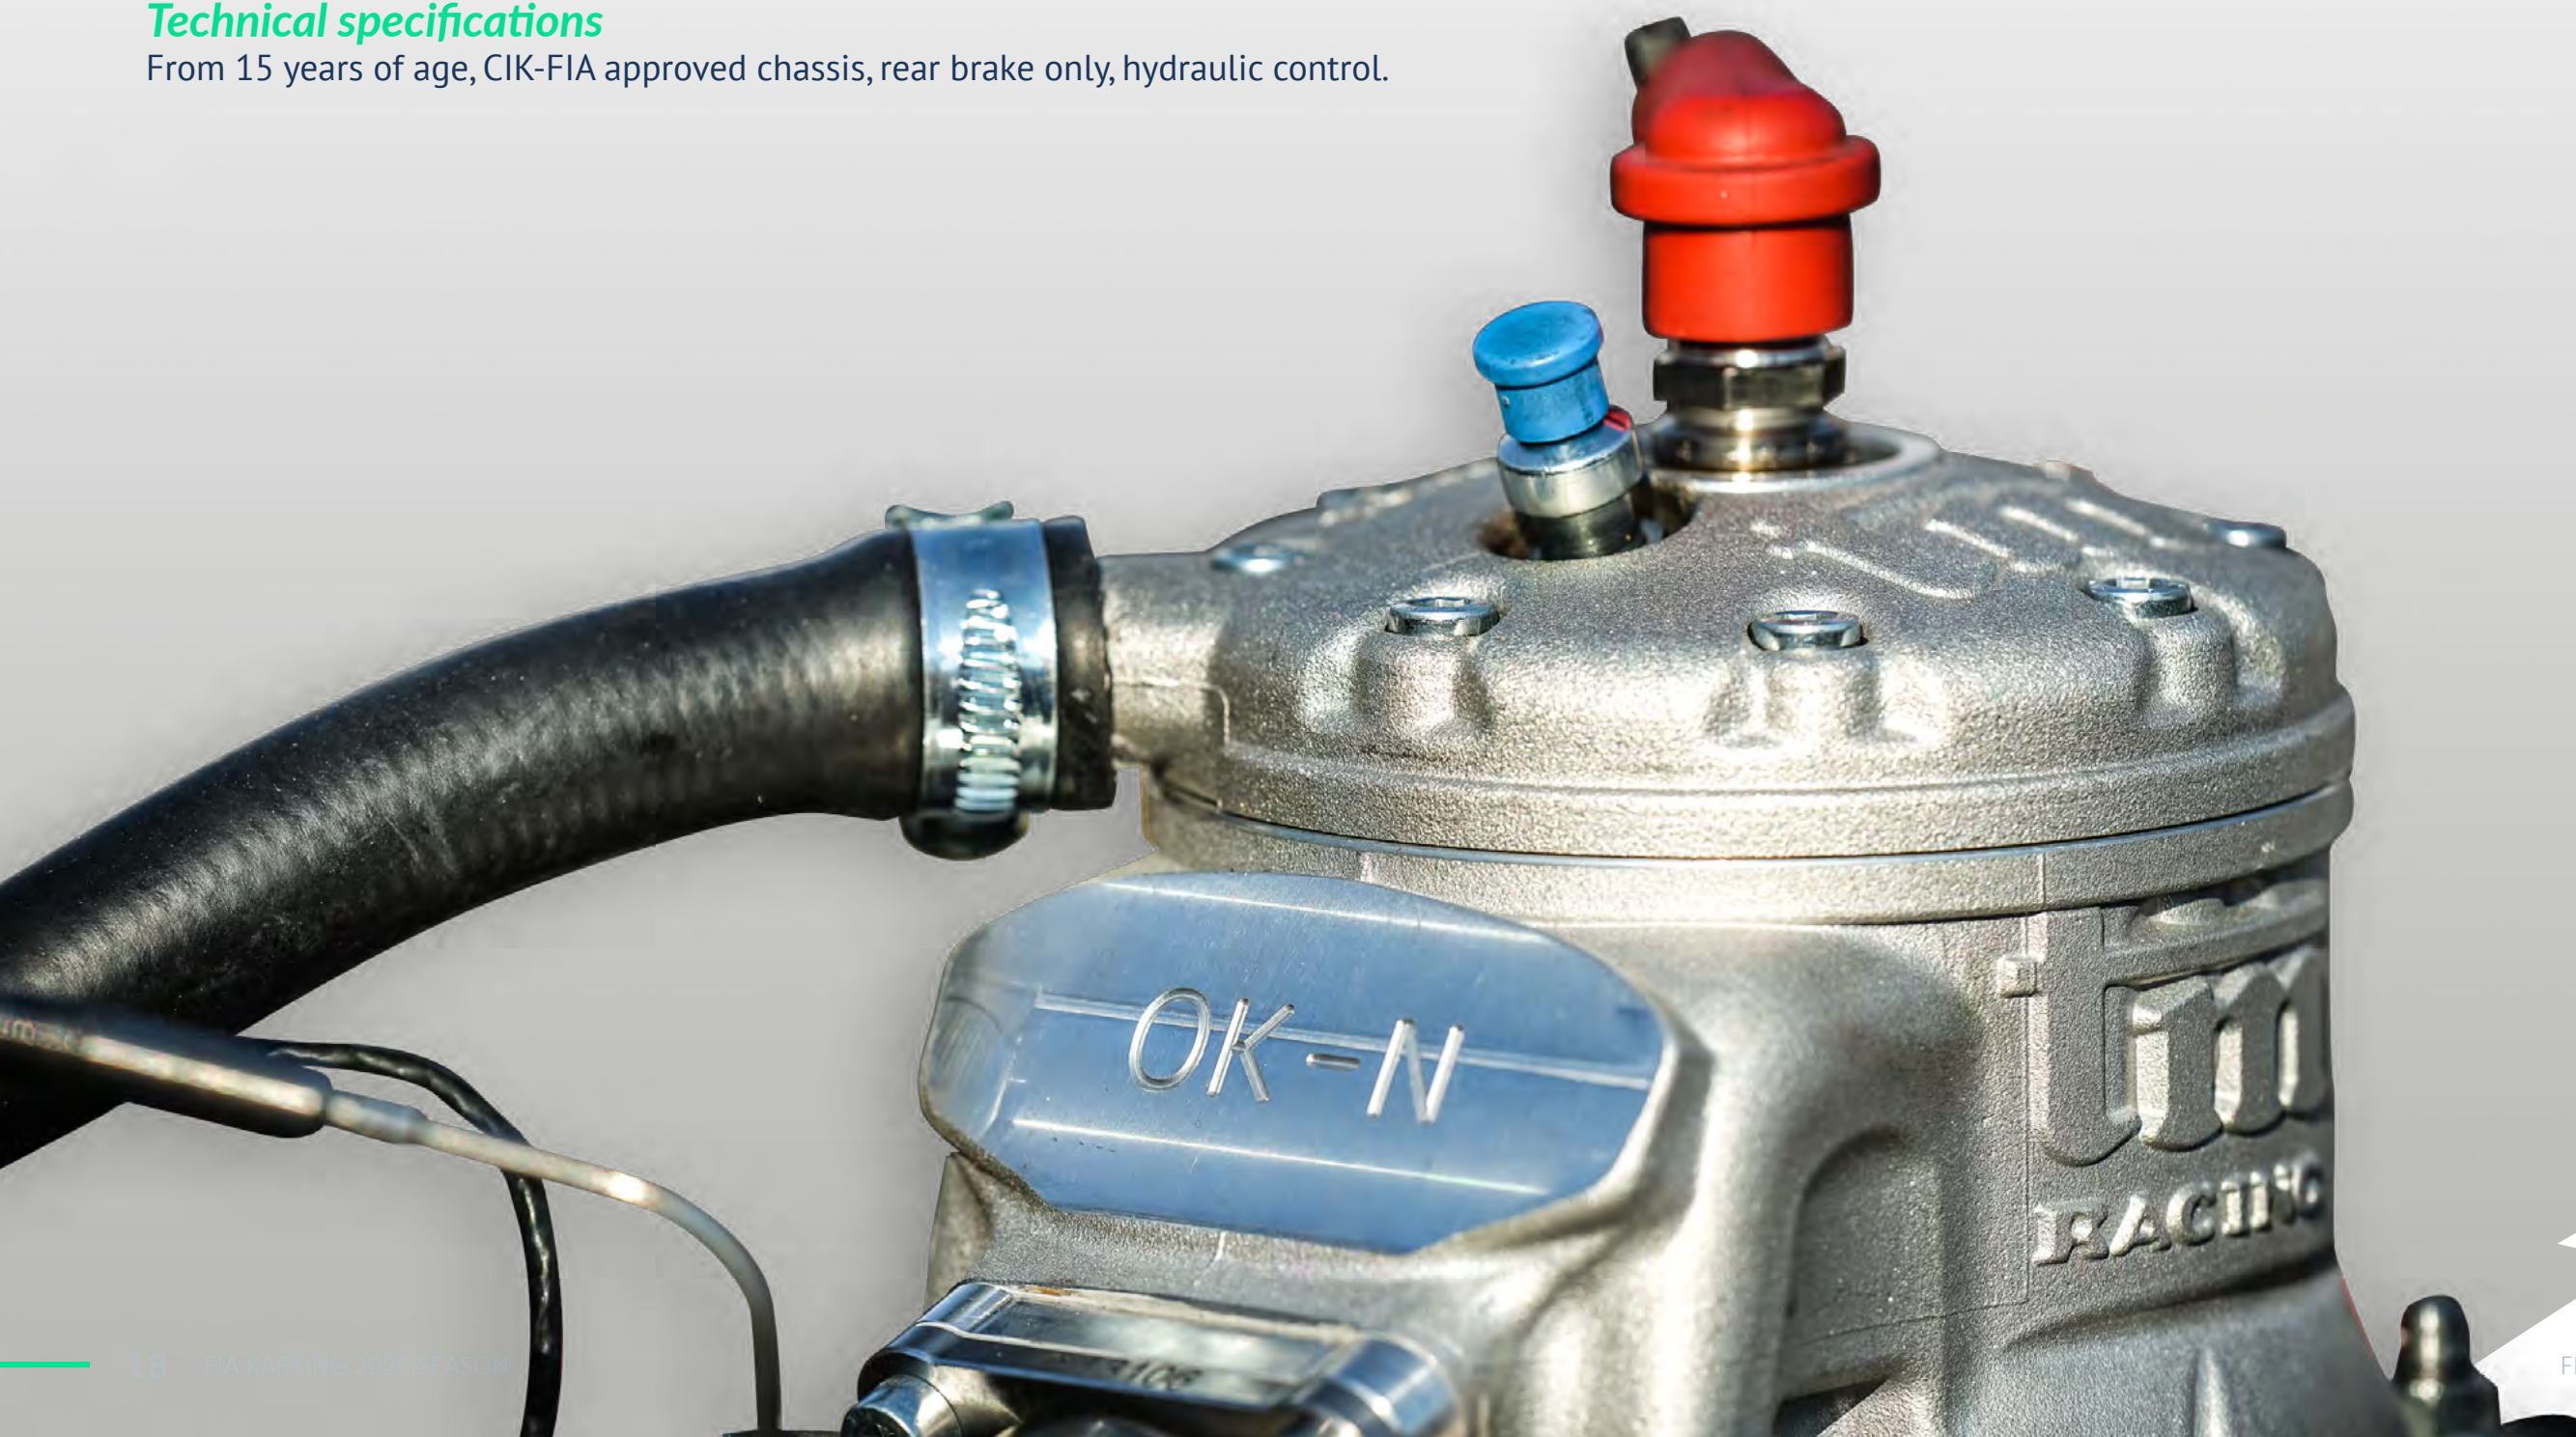

From 15 years of age, CIK-FIA approved chassis, rear brake only, hydraulic control.

Engine 125 cc two stroke with balance shaft, water cooled, max. engine speed 15000 rpm, power +/- 35 hp, monotype exhaust, 30mm bowl carburettor or 24mm diaphragm carburettor.

No gear change, no clutch, no starter, no battery.
Decompression valve for easy starting with a pusher.

Minimum weight: 155 kg with driver on board

A simple and economical solution has been chosen to develop a Junior version of the OK-N. A 26 mm flange on the exhaust differentiates the OKN-Junior from its elder OK-N. The engine itself is strictly identical, as well as the carburettor and the exhaust system.

A COHERENT SPORTING ENVIRONMENT TO GUARANTEE ACCESSIBILITY

The unique technical framework that governs OK-N had to be accompanied by a harmonised sporting vision between all the Federations, with the FIA Karting World Cup - OK-N in sight from 2024.

To this end, the FIA Karting recommends that the National Sporting Authorities put in place a simplified sporting scheme from 2023 onwards, in line with the accessibility values of the OK-N.

The duration of the events should not exceed two days. Each competitor will have only one chassis, one engine and one and a half sets of racing tyres.

The National Sporting Authorities will therefore be able to organise the qualifications for the FIA Karting World Cup - OK-N as closely as possible to the sporting regulations of this benchmark event, for which entry will be free of charge in 2024 for the selected drivers.

The "Road to the World Cup - OK-N" will be organised this year alongside the FIA Karting World Championship - OK and OK-Junior in October 2023 in Franciacorta (ITA), as a prelude to the first FIA Karting World Cup - OK-N announced for 2024.

The first reactions to this new concept are already very positive and several countries have already confirmed their wish to offer the category in their national championships from 2023.

INTERNATIONAL KARTING RANKING, A COMPUTERISED RESULTS MONITORING SYSTEM

The IKR is a computerised ranking system open to all drivers holding a licence issued by a National Sporting Authority recognised by the FIA and participating in a competition karting event. The results of the IKR produce an overall ranking of the drivers, as well as sub-rankings based on a model similar to the ATP tennis ranking. Its purpose is to promote the standardisation of kart racing throughout the world.

This ranking will give an overview of a driver's performance regardless of the category in which they compete, as long as they use CIK-FIA homologated or recognised equipment. It is an additional opportunity to reward drivers through an overall ranking and to award them special mentions or an honorary title of "driver of the year" for example. Multiple possibilities of classification according to different criteria (age group, nationality, type of event, etc.) will be enabled by the system set up, which will become more interesting over time.

The points are calculated automatically from a logarithmic rule. The ranking takes into account the type of event through different grades, the position of the driver or the team (endurance) in the final ranking of the event, as well as the number of drivers entered in the category. Two weighting coefficients are used in the calculation according to the equipment used and the format of the event.

The IKR will be updated weekly every Wednesday at 18:00 CET and can be reached at the address: <https://www.fiakarting.com/page/international-karting-ranking-classification>

THE FIA KARTING SPORTING SEASON

The CIK-FIA and its promoter organise three FIA Karting World Championships every year, true peaks of the season each decided during a single event, in addition to the FIA Karting World Cup - KZ2 re-launched in 2022.

Four FIA Karting European Championships are also on the programme with several events each.

The FIA Karting Academy Trophy brings together the best prospects between the ages of 12 and 14 from around 40 countries around the world to compete on a one-make basis.

The Karting Competitions offer extensive track time to the Drivers during many runs lasting between 10 and 20 minutes.

Race format

Free practice from Friday
(from Thursday for the 1st event)

Qualifying Practice on Friday

Qualifying Heats and Super Heats until Sunday morning

Finals on Sunday afternoon for the 36 finalists in each category

THE FIA KARTING ACADEMY TROPHY, A GLOBAL PROGRAMME FOR THE DETECTION OF YOUNG TALENTS

The FIA Karting Academy Trophy is a formula, unique in the world, aimed at training and detecting young talents between the ages of 12 and 14, pitting 54 pilots, including one young woman selected by the FIA Commission “Women in Motorsport” representing more than 40 countries and five continents.

They are tested on identical OK-Junior equipment, made available by the CIK-FIA thanks to the participation of the OTK Kart Group (chassis and engines). The karts, strictly identical, are drawn before each round. National federations are very much involved in this commitment.

The FIA Karting Academy Trophy takes place over three events in three different countries at the same time as the OK and OK-Junior Competitions.
